11. Context Art Miami (see last year's report)

Context, founded in 2012, is accompanying its sister fair Art Miami in its move downtown. Highlights at the new location will include a little something for the younger set: the fair pavilion will feature a multi-sensory interactive art installation aimed at children ages 3 to 13 from Young at Art Museum. Visitors will also be greeted by *OPHELIA*, an architectural, interdisciplinary live performance incorporating video sculpture by Nadja Marcin, presented by New York's Jaeckel Gallery. The piece will draw on masterworks from art history—such as John Everett Millais's painting of the same name—to critique the negative effects of human activity on the planet.
